

Pr EN 45545-2 declaration

We have no certificate from an accredited laboratory for the pr EN 45545-2 because this is still a draft standard (pr).

However, supplier information, oxygen index and ITC (Conventional Toxicity Index) show that the matter of our fireproof tubing should pass the tests. According to the standard, the tubing is in compliance with the requirements R23, R24 and R25 of products which are not listed. These products can be located inside and outside a vehicle to an exposed surface ≤ 0.20 m² or 500g indoor or 1000g outdoor. For each of these requirements, our values of ITC and oxygen index allows us to place our fireproof tubing in the level of highest risk : HL3.

PRODUCT IN COMPLIANCE WITH THE ABOVE SPECIFICATIONS:

LEGRIS part number: 1025PxxRxx, 1100PxxRxx, 2005PxxRxx, 2010PxxRxx
Description: tube polyamide à haute résistance au feu

Date: Tuesday, 29 November 2011

Olivier GUILLOU
Technical Director

A handwritten signature in blue ink, appearing to read 'Olivier Guillou', with a long horizontal stroke underneath.
