 **WARNING**

FAILURE OR IMPROPER SELECTION OR IMPROPER USE OF THE PRODUCTS AND/OR SYSTEMS DESCRIBED HEREIN OR RELATED ITEMS CAN CAUSE DEATH, PERSONAL INJURY AND PROPERTY DAMAGE.

This document and other information from Parker Hannifin Corporation, its subsidiaries and authorized distributors provide product and/or system options for further investigation by users having technical expertise. It is important that you analyze all aspects of your application and review the information concerning the product or system in the current product catalog. Due to the variety of operating conditions and applications for these products or systems, the user, through its own analysis and testing, is solely responsible for making the final selection of the products and systems and assuring that all performance, safety and warning requirements of the application are met. The products described herein, including without limitation, product features, specifications, designs, availability and pricing, are subject to change by Parker Hannifin Corporation and its subsidiaries at any time without notice.

**SALE CONDITIONS**

The items described in this document are available for sale by Parker Hannifin Corporation, its subsidiaries or its authorized distributors. Any sale contract entered into by Parker will be governed by the provisions stated in Parker's standard terms and conditions of sale (copy available upon request).

### The System

The P3X system allows units to be connected together, without the use of pipe connectors, saving space; providing constant mounting centres; whilst maintaining a modern aesthetically pleasing appearance.

The P3X Filters are specially designed to efficiently filter out rust, dirt, moisture and other impurities from compressed air lines. Operation is fully automatic with a minimum of pressure drop. Coalescing filters and adsorber filters for high purity air are also included in the P3X series.

The P3X Regulators are designed to provide quick response and accurate pressure regulation for the most demanding hi-flow industrial applications. The rolling diaphragm was designed for long trouble-free operation and will not rupture or tear under high cycle or other demanding applications.

The P3X mist lubricators are designed to provide lubrication for many general purpose applications in a pneumatic system.

**New Technology**

The Moduflex Lite FRL system is constructed from ultra light weight technopolymers instead of the traditional aluminium or zinc die cast, this means that is up to 45% lighter than conventional units. This non-metal construction also means that the Moduflex Lite is corrosion free enabling it to be used in harsh industrial environments where anti freeze or aggressive synthetic oils are present.

The use of technopolymers in the design of Moduflex Lite has facilitated a universal body design, this has resulted in reducing the number of variants required to cover the full spectrum of applications. This can dramatically lower logistic costs and simplify stock holding for customers making the Moduflex Lite a very cost effective solution.

# Nano Mist

**New Nano Mist Technology,  
New Lubricator Concept.  
Self-Adjusting.**

With conventional lubricators, only the oil volume per time unit can be adjusted. If the demand changes, the quantity dispensed still remains constant.

The Moduflex Lite lubricator concept sets new benchmarks here. For the first time, the oil volume is automatically adjusted to the flow rate. This ensures that there is neither too little nor too much oil in the system, which leads to clear economic and ecological advantages. In addition, with conventional systems, the distance between the lubricator and the equipment has to be less than 8 meters. With larger distances, the dispensed oil is deposited as a wall flow. The new lubricator principle of the Moduflex Lite allows for distances of up to 40 meters. This opens up new scope for the design of even more efficient production systems.

**Popular Combinations**

**Slide Valve + Filter/Regulator + Lubricator Combinations (50mg/m<sup>3</sup>)  
 5 micron element, 8 bar Regulator + Gauge and Wall Mounting Brackets**

Port size	Combined Manual/Semi-Auto Drain	Flow dm <sup>3</sup> /s	Weight (g)	Auto Drain	Flow dm <sup>3</sup> /s	Weight (g)
G <sup>1</sup> / <sub>2</sub>	<b>P3XAA14GECNGPNW</b>	76	1300	<b>P3XAA14GEANGPNW</b>	76	1300

\* flow with 6,3 bar inlet pressure and 0,5 pressure drop.

**Technical Information**

Fluid:	Compressed air
Maximum inlet pressure:	16 bar
Temperature range*:	
Auto drain:	-10°C to +60°C
Combined drain:	-40°C to +60°C
Particle removal:	1, 5 & 40 micron
Air quality:	Within ISO 8573-1 : 1991 Class 3 and 5 (particulates) Within ISO 8573-1 : 2001 Class 6 and 7 (particulates)
Typical flow with 5µm element 6,3 bar inlet pressure and 0.5 bar pressure drop:	1/2" size 55 dm <sup>3</sup> /s
Semi-auto drain: bowl pressure to close drain	0.8 bar
Auto drain: bowl pressure to close drain Operating range manual override facility	0.8 bar 0.8 to 16 bar
Bowl sump capacity:	60 cm <sup>3</sup>

\* Air supply must be dry enough to avoid ice formation at temperatures below +2°C

**Dimensions (mm)**

**Material Specification**

Body:	High tech polymer
Sight glass:	Polypropylene
Body cover:	ABS
Element:	Sintered P.E.
Seals:	Nitrile NBR
Drains:	Manual / Semi-auto: Acetal Automatic: PA / Brass

**Flow characteristics**

**(1/2) 5 Micron Filter**

**(3/4) 5 Micron Filter**

**Coalescing Filter**

- Integral 1/2 or 3/4 ports
- Removes liquid aerosols and sub micron particles
- Oil free air for critical applications, such as air gauging, pneumatic instrumentation and control

**Note:** To optimise the life of the coalescing element, it is advisable to install a P3XFA pre-filter with a 5 micron element upstream of the coalescing filter.

\* flow with 6,3 bar inlet pressure and 0,2 pressure drop.

**Technical Information**

Fluid:	Compressed air
Maximum inlet pressure:	16 bar
Temperature range*:	-10°C to +60°C
Media specifications:	
Coalescing efficiency	(0.3 to 0.6 micron particles): 99.97%
Max. oil carryover (PPM w/w):	0.008 mg/m <sup>3</sup>
Typical flow element @ 6,3 bar inlet pressure and 0.2 bar pressure drop:	16 dm <sup>3</sup> /s
Manual / Semi-auto drain:	
Bowl pressure to close drain	0.8 bar
Auto drain:	
bowl pressure to close drain	0.8 bar
Operating range manual override facility	0.8 to 16 bar
Bowl sump capacity:	60 cm <sup>3</sup>

\* Air supply must be dry enough to avoid ice formation at temperatures below +2°C

**Material Specification**

Body:	High tech polymer
Sight glass:	Polypropylene
Filter cover:	ABS
Coalescing element:	Borosilicate & Nano fibres
Top & bottom end cap:	Glass filled nylon - Black
Support cylinders:	Grade 430 stainless steel
Support media:	Polypropylene
Anti re-entrainment barrier:	Polyester
Ensapulate:	Epoxy resin / Hardener
Seals:	Nitrile NBR
Drains:	Manual / Semi-auto: Acetal
	Automatic: PA / Brass
Differential pressure indicator materials:	
Body:	Acetal
Internal parts:	Acetal
Spring:	Stainless steel
Seals:	Nitrile NBR
Screws:	Steel / zinc plated

**Dimensions (mm)**

**Service kits**

Description	Order code
0.01 micron coalescing element kit	<b>P3XKA00ESC</b>
Bowl kit with combines manual/semi auto drain	<b>P3XKA00BSC</b>
Bowl kit with auto drain	<b>P3XKA00BSA</b>
Differential pressure indicator kit	<b>P3XKA00RQ</b>

**Flow characteristics**

**(1/2) 0.01µm Coalescing Filter Saturated**

**(3/4) 0.01µm Coalescing Filter Saturated**

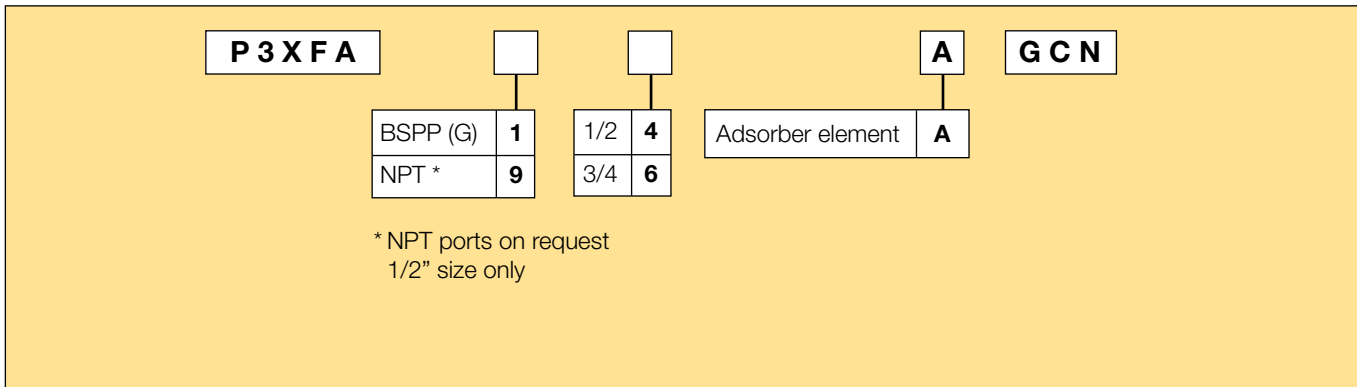

**Adsorber Filter**

- Integral 1/2 or 3/4 ports
- Adsorber activated carbon element removes oil vapours and most hydrocarbons

**Note:** To optimise the life of the adsorber element, it is advisable to install a P3X coalescing 0.01 µm filter upstream of the adsorber filter.

**Options:**

Port size	Description	Order Code	Flow dm <sup>3</sup> /s *	Max bar	Min temp °C	Max temp °C	Bowl capacity cm <sup>3</sup>	Height mm	Width mm	Depth mm	Weight g

**Flow characteristics**

**(1/2) Adsorber Filter**

**(3/4) Adsorber Filter**

**Regulator**

**Symbols**

Self relieving regulator with gauge

Non relieving regulator

- Integral 1/2 or 3/4 ports
- Secondary pressure ranges 8 & 16 bar
- Rolling diaphragm for extended life
- Secondary aspiration plus rolling diaphragm provides quick response and accurate pressure regulation.
- Optional tamperproof regulator, up to x 3 padlocks
- Relieving & Non-relieving types
- Low temperature -40°C as standard

**Options:**

Wall bracket kit - Stainless steel	<b>P3XKA00MW</b>
Panel mount nut	<b>P3XKA00MM</b>

**Material Specification**

Body:	High tech polymer
Sight glass:	Polypropylene
Body cover:	ABS
Element:	Sintered P.E.
Seals:	Nitrile NBR
Drains:	Manual / Semi-auto: Acetal Automatic: PA / Brass
Bonnet:	High tech polymer
Control knob:	Polyamide
Valve:	Brass / Nitrile
Screws:	Stainless steel

**Flow characteristics**

**(1/2) 5 Micron Filter/Regulator**

**(3/4) 5 Micron Filter/Regulator**

**Lubricator**

**Symbols**

Lubricator

- Integral 1/2 or 3/4 ports
- Proportional oil delivery over a wide range of air flows.
- No adjustment necessary (self adjusting)
- Fill from top under system pressure

**Options:**

\* Flow with 6,3 bar inlet pressure and 0,5 pressure drop.

<sup>1)</sup> Best for pre-lubricated pneumatic components (e.g. rodless cylinder, actuators, valves etc.)

<sup>2)</sup> Best for components which require effective lubrication (e.g. vane driven pneumatic motors / air tools etc.)

**Technical Information**

Fluid:	Compressed air
Maximum inlet pressure:	16 bar
Temperature range*:	-10°C to +60°C

\* Air supply must be dry enough to avoid ice formation at temperatures below +2° C  
 Low flow start point (lubrication pick-up): at 6.3bar inlet pressure 7 dm<sup>3</sup>/s  
 Typical flow with 6.3bar inlet pressure and 0.5 bar pressure drop: 78 dm<sup>3</sup>/s

**Note :** Fill lubricant from top only

**Material Specification**

Body:	High tech polymer
Bowl sight glass:	Polypropylene
Sight dome:	PA (Nylon)
Lubricator cover:	ABS
Seals:	Nitrile NBR

**Dimensions (mm)**

**Service kits**

**Flow characteristics**

**Dump Valve & Combined Soft Start Dump Valve**

**Symbols**

- Modular design with 1/2" & 3/4" integral ports (BSPP or NPT)
- Provides for the safe introduction of pressure
- Automatically dumps downstream pressure on the loss of pilot signal
- Adjustable slow start
- Solenoid or air pilot options
- High flow & exhaust capability

P3X Series Combined Soft Start/Dump Valves, provide for the safe introduction of pressure to machines or systems. Soft Start/Dump Valves when set, allow the pressure to gradually build to the set point before fully opening to deliver full flow at line pressure.

The controlled introduction of pressure can be an important safety factor and prevent damage to tooling when air pressure is introduced at machine or system start up.

**Options:**

**Technical Information**

Fluid:	Compressed air
Maximum pressure Solenoid operated 22mm coil:	10 bar
Maximum pressure Solenoid operated 30mm coil:	16 bar
Minimum operating pressure:	2 bar
Temperature range* Solenoid operated:	-10° to + 60° C
Temperature range* Air Pilot operated:	-10° to + 60° C
Air Pilot port:	1/8"
Exhaust port:	1/2"
Gauge port:	1/4"
Typical flow with 6.3bar inlet pressure and 1 bar pressure drop:	1/2" 80 dm <sup>3</sup> /s
	3/4" 80 dm <sup>3</sup> /s

\* Air supply must be dry enough to avoid ice formation at temperatures below +2°C  
 Snap pressure: Full flow when downstream pressure reaches 50% of the inlet pressure

**Material Specification**

Body:	Aluminium
Body cover:	ABS
Valve:	Brass / NBR composite
Pilot valve booster:	Aluminium
Seals:	Nitrile NBR

**Dimensions (mm)**

**Flow characteristics**

**Soft Start Dump Valve 24v 1/2" Port**

**Pilot Regulator 1/2" Port**

**Modular Slide Valve**

**Symbol**

- Padlockable.
- When the inlet pressure is turned off the downstream vents through the exhaust port.

P3X Series Slide Valves provide shut off line pressure to prevent unauthorised adjustment.

**Options:**

<b>P 3 X</b>	<b>V A</b>			<b>LS N</b>
BSPP (G)	<b>1</b>	G1/2	<b>4</b>	
NPT *	<b>9</b>	G3/4	<b>6</b>	

\* NPT ports on request (1/2" size only)

**Technical Information**

Operating Temperature:	-10°C to +60°C	
Maximum Supply Pressure:	16 bar	
Weight (g):	1/2	300g
	3/4	300g

**Material specification:**

Body:	High tech polymer
Handle:	Polyamide
Seals:	Nitrile NBR
Exhaust muffler:	Sintered bronze

**Dimensions (mm)**

**Modular Manifold**

P3X Series Manifolds, provide up to 2 extra outlet ports, they may be assembled at any position in a combination e.g. before the lubricator to provide oil free take off or at the end of a combination to provide extra outlet ports.

Description	Order code BSPP	Order code NPT	Weight (g)
G1/2"	<b>P3XMA1V0N</b>	<b>P3XMA9V0N</b>	170

**The Problem**

Compressed air is an essential power source that is widely used throughout industry. This safe, powerful and reliable utility can be the most important part of your production process.

However, your compressed air will contain water, dirt, wear particles and even degraded lubricating oil which all mix together to form an unwanted condensate. This condensate often acidic, rapidly wears tools and pneumatic machinery, blocks valves and orifices causing high maintenance and costly air leaks. It also corrodes piping systems and can bring your production process to an extremely expensive standstill.

The use of high efficiency compressed air filters fitted with condensate drains will remove the oil, water and dirt particles to eliminate the abrasive sludge in the compressed air system.

In many cases this action alone is not enough, as modern production systems and processes demand an even higher level of air quality. Where required “point of use” membrane air dryers can provide the correct air quality, without the need for drying the complete compressed air installation, which can be both costly and totally unnecessary.

**The Efficient Solution**

The Parker P3X Series membrane air dryers employ an advanced molecular membrane technology that dries the compressed air and lowers the pressure dewpoint (PDP). The compact space saving design offer the user uncompromised performance from a dedicated “point-of-use” air dryer. It is easy to install and will transform an ordinary process into a highly reliable and efficient production operation.

The membrane material is formed into bundles of individual fibres retained in a cartridge. Water vapour escapes through the walls of the fibre to a sweep chamber from where it is continuously vented to atmosphere as a gas. A fraction of the dried air is routed through the sweep chamber to continuously purge and exhaust moisture vapour.

The P3X series membrane dryers can be used for many years to dry air continuously. They instantly respond to any change in inlet conditions. The P3X dryers perform at temperatures between 2° and 60° C (ambient or inlet) and handle pressure from 5 bar to 16 bar. The inlet flow rate and pressure determine the outlet dew point suppression. In other words, membrane dryers deliver a constant level of drying protection that follow the rise or fall of the inlet dew point temperature.

Prefilters mounted immediately upstream of the membrane dryer keep out liquids and solids to allow an almost unlimited service life. Because water vapour passes right through the membrane material, it does not accumulate there, so membranes do not become saturated and never need to be regenerated. The P3X membrane dryers have no moving parts to wear out, they are non-electric and are suitable for hazardous application areas. They require no RF shielding or protection, they do not use refrigerant gas or potentially dusty desiccants.

The P3X membrane dryer is based upon well proven principles which offer a simple cost effect alternative to refrigeration and desiccant dryers.

Available in 6 sizes, the membrane dryer is compatible with the modular P3X air preparation series which can easily be connected to the P3X filters providing a clean dry air system at the point-of-use.

**Advantages of the P3X Series Membrane Dryers**

- 

Dried compressed air is immediate

No electrical connection necessary
- 

Suitable for hazardous areas

No CFC's/FC's
- 

Compatible with the P3X series modular air preparation series

Low pressure drop

No moving parts

No drying medium required

Low purge air usage

Low operating costs

**Dryer types with PDP reduction & flow values**

- Removes water vapour & lowers the PDP
- Compact design
- No electrical connections necessary
- Suitable for hazardous environments
- No moving parts
- Maintenance & wear free
- No change in air consumption
- Low pressure drop less than 0.1 bar
- Minimal purge air consumption
- Modular design - compatible with the P3X air prep series

**Membrane dryer**

Port size	Size	Description	Order Code
G1/2	10	Membrane dryer with return tube	<b>P3XJA14CA1N</b>
G1/2	15	Membrane dryer with return tube	<b>P3XJA14CB1N</b>
G1/2	20	Membrane dryer with return tube	<b>P3XJA14CC1N</b>
G1/2	25	Membrane dryer with return tube	<b>P3XJA14CD1N</b>
G1/2	35	Membrane dryer serial type	<b>P3XJA14CE1N</b>
G1/2	50	Membrane dryer serial type	<b>P3XJA14CF1N</b>

**Note:** For NPT threaded connections replace the 6th digit from **1** to **9** i.e. P3XJA**9**4CA1N

**Wall mounting bracket kit**

Order Code

**P3XKA00MWD** Top & bottom wall mounting bracket

**Note:**

For optimum system performance and maintenance free conditions, Parker recommend the dryer is preceded with a 5 micron and 0.01 coalescer filter from the P3X series.

**Complete Filter / Dryer System combinations available on request**

**F + Fc + MD**

**F + Fc + MD + R**

**F + Fc + MD + R + Fa**
