**WARNING**

**FAILURE OR IMPROPER SELECTION OR IMPROPER USE OF THE PRODUCTS AND/OR SYSTEMS DESCRIBED HEREIN OR RELATED ITEMS CAN CAUSE DEATH, PERSONAL INJURY AND PROPERTY DAMAGE.**

This document and other information from Parker Hannifin Corporation, its subsidiaries and authorized distributors provide product and/or system options for further investigation by users having technical expertise. It is important that you analyse all aspects of your application and review the information concerning the product or system in the current product catalogue. Due to the variety of operating conditions and applications for these products or systems, the user, through its own analysis and testing, is solely responsible for making the final selection of the products and systems and assuring that all performance, safety and warning requirements of the application are met. The products described herein, including without limitation, products features, specifications, designs, availability and pricing, are subject to change by Parker Hannifin Corporation and its subsidiaries at any time without notice.

**SALE CONDITIONS**

The items described in this document are available for sale by Parker Hannifin Corporation, its subsidiaries or its authorized distributors. Any sale contract entered into by Parker will be governed by the provisions stated in Parker's standard terms and conditions of sale (copy available upon request).

## Moduflex Valve System

The Moduflex Valve System redefines flexibility for pneumatic users. Whether configured from basic components or ordered as a pre-assembled and tested valve island, Moduflex flexibility is unmatched in the market place.

### V Series

Multi wiring

### V Series

Industrial Ethernet &amp; IO-Link

### T Series

Lockable Connector IP67

Clip Connector IP40

### S Series

Lockable Connector IP67

Clip Connector IP40

### P Series

## Innovative

The 6 patents awarded to the Moduflex Valve System reflect that innovation is core to the Parker design process. Maintaining a clear understanding of our customer's expectations has defined the individuality of the Moduflex, and clearly differentiated it as a leading automation solution.

## Adaptive

No other system can be adapted so simply once specified. Unique, captive fitting release system, quick release electrical connectors and single mechanical screw connection between manifolds offer the ultimate capability for late system design changes.

## Multi-Functional

From stand-alone valves to communicant ready valve islands, from cylinder flow controls to vacuum generators with integrated blow-off, the Moduflex Valve System meets the requirements of the whole automation spectrum.

## Light-weight

A communicant valve manifold with 8 pneumatic outputs weighs a mere 800grams, making the Moduflex Valve System the perfect choice for end of arm tooling application.

**Moduflex Valve technology**

Two technology platforms enable the compact design and high performance of the Moduflex Valve System. The compact dual 4/2 and 3/2 valves utilise well proven Parker seal technology. The standard 4/2 valves adopt the long life super durable ceramic switching technology.

**Dual 4/2 valve****4/2 Valve****Moduflex Complete Control**

With the introduction of the dual 4/2 size 1 valves, Moduflex now offers unrivalled ability of matching valves to exact flow requirements, ensuring cost and space are minimised. In addition, Moduflex Valve System offers all the necessary control peripherals to provide a complete automation solution. Moduflex is the complete control package.

## Moduflex Valve System - P2M

With high performance technology, Moduflex opens a new era in the field of electro-pneumatic automation. Valves are easily assembled into compact islands that conform to any application requirement.

### Adaptive pneumatic

With the Moduflex Valve design, pneumatic automation is now totally flexible.

- Valves may be stand-alone or assembled into short or long islands, depending on application.
- IP 65-67 water and dust protection allows the valve to be installed near the cylinders for shorter response time and lower air consumption.
- The IP40 water and dust protection allows an optimised electrical connection for applications into cabinet or soft and none aggressive environments.
- Valve island electrical connections may be integrated.
- Push-in pneumatic connectors may be straight or elbow, for 4, 6, 8 or 10 mm OD tubes.
- A given island may incorporate different valve sizes in order to fulfill each cylinder flow requirement. A single island will accommodate all cylinders, up to 100 mm bore size.
- Island modifications are easy: add or remove a valve, change a valve function, change tubing size or change piloting in minutes.
- Manual overrides are also adaptive: locking for set up, non-locking for production.

stand-alone valve

short valve island

or long valve island

straight or elbow  
pneumatics connectors

### Easy man-machine dialog

- Moduflex incorporates LED indicators, manual overrides (MAN), in conjunction with valve symbols and identification.
- As compared to traditional 5/2 valve islands, Moduflex offers a more user friendly dialogue: each marking, LED and MAN are all lined up with the corresponding cylinder output.

**Island with traditional 5/2 spool valves:**  
Before any action, LED and MAN have to be carefully related to the corresponding output.

Man-machine dialogue is difficult.

**Island with Moduflex 4/2 slides valves:**  
Each marking, LED and MAN line up with the corresponding output.

Man-machine dialogue is easy.

## Moduflex Valve System - P2M

### Adaptive design

individual electrical connector

Lockable M8 Connector - IP67 or Clip Connector - IP40

or Valve Bank with integrated IP65 electrical connections

3 valves sizes in the same valve bank

### Flows and tube connections

Optimal nominal section for a full flow with appropriate fitting

**3 valve sizes lead to a global choice of tube sizes, thus covering all usual applications**

Size 2		Size 1		Size 01	
Nominal section 40 mm <sup>2</sup>		Nominal section 12 mm <sup>2</sup>		Nominal section 4 mm <sup>2</sup>	
Qn 800 Nl/mn* Qmax 1340 Nl/mn*		Qn 310 Nl/mn* Qmax 510 Nl/mn*		Qn 165 Nl/mn* Qmax 275 Nl/mn*	
* For 3/2 functions Qn 450 Nl/mn Qmax 805 Nl/mn		* For 3/2 functions Qn 235 Nl/mn Qmax 415 Nl/mn			
Tube size to cylinder	Ø Ext. 10 mm Ø 63 to Ø 100 mm	Ø Ext. 8 mm Ø 40 to Ø 63 mm	Ø Ext. 6 mm Ø 25 to Ø 40 mm	Ø Ext. 4 mm Ø 6 to Ø 25 mm	
Cylinder bore size					

Valve outputs are equipped with clip-on push-in tube connectors with a choice of straight or elbow in different sizes

6 mm 8 mm 10 mm 12 mm 4 mm 6 mm

Typical cylinder speeds are shown on next pages. Module size, tube diameter and length, cylinder size, load and exhaust collection are taken into account.

## Moduflex Valve System - P2M

### Cylinder working speed charts

The charts below give the cylinder working speeds at 6 bar, under different conditions:

- non loaded or 50 % loaded double acting cylinder;
- exhaust piped through 2 m. long tubing, or exhaust muffled.

#### cylinder working speeds, in cm/s

standard conditions:

- 1 double acting cylinder
- 1 working pressure:  
P = 6 bar

specific conditions:

- exhaust piped through tube 2 m long, with next ID above ID tube from valve to cylinder.

- non loaded cylinder

valve module	tube ID	tube OD	tube length	Cylinder bore size						
				25 mm	32 mm	40 mm	50 mm	63 mm	80 mm	100 mm
Size 1	2 x 4 mm	1 m.	43 cm/s	28 cm/s						
		3 m.	27	17						
	2.7 x 4 mm	1 m.	85	52	33 cm/s					
		3 m.	55	34	21

## Moduflex Valve System - P2M

### Field of application :

- stand-alone valve modules **S** series
- valve island modules, **T** series and **V** series

Note : a complete machine cycle includes:

- the cylinder displacement times that can be deducted from the cylinder speeds given below
- the cylinders starting times that depend on the cylinder strokes and thus could not be included in the charts below.

#### cylinder working speeds, in cm/s

standard conditions:

- <sup>1</sup> double acting cylinder
- <sup>1</sup> working pressure:  
P = 6 bar

specific conditions:

- muffled exhaust (non collected)
- non loaded cylinder

## Moduflex Valve System - P2M

### Two technology platforms

**The well proven Parker seal technology**

For 3/2 and dual 4/2 functions

**Ceramic switching technology**

For single 4/2 functions

**Pneumatic valve body**

**Visualisation LED's**

For easy man-machine dialog

**Configurable manual override**

For locking, non-locking or condemned manual override

**24 V DC solenoid valve**

**Pneumatic symbol**

**Locking system for clip-on fittings**

**Straight or elbow clip-on push-in fittings**

For size 1: 4 or 6 mm OD tubing  
For size 2: from 6 to 12 mm OD tubing

**Auxiliary channels**

Independent pilot pressure and exhaust

**Internal connection**

Up to 19 solenoids

**Associating tie-rod**

For easy module assembly

**Clip connector - IP40**

Economic connection for traditional wiring

**M8 - 3 pins for lockable connector - IP67**

For traditional wiring

**4 mm orientable push-in fitting**

For pneumatic remote pilot

### Material Specification

Plastics:	Polyamide reinforced fibreglass
Screws:	Zinc plated steel
Seals:	Nitrile rubber
Valve mechanism:	Aluminium alloy
Plate:	Ceramic

### Certification

EMC / CE mark:	According to EN 61 000-6-2
Dust & water protection:	According to EN 60529 - NEMA 4
- S & T series:	M8 connector: IP67 Clip connector: IP40
- V series:	IP65*

\* For 25 Pins D-Sub connection: IP40 or IP65 depending on the cable

Moduflex specifications answer most industries automation requirements.

Applications run from clean room electronic manufacturing to process industries in aggressive environments.

### Pneumatic specifications

#### General Specification

<b>Fluid</b>		Air or Inert gas, Filtered 40µ (class 5 according to ISO 8573-1) Dry (class 4 according to ISO 8573-1) or Lubricated (with lubricated air, we recommend external pilot supply with non lubricated air)
<b>Operating Pressure</b>		-0,9 to 8,0 bar
<b>Piloting Pressure</b> for operating pressures below, use external pilot by configuring the head module accordingly (function available on standard head module)	3/2 N.C. or N.O.	3,5 to 8,0 bar
	4/2 single solenoid	3,0 to 8,0 bar
	4/2 double solenoid	3,0 to 8,0 bar
<b>Pilot supply</b>	S Series	Internal
	T & V Series	Mixed internal/external (configurable on the standard head module)
<b>Exhaust collection</b>		All collectable (including pilot solenoid valve exhaust)
<b>Life cycle (all sizes)</b>	3/2 N.C. or N.O.	60 million operations (with dry air, 2 Hz, 20°C, 6 bar)
	Single and Dual 4/2	100 million operations (with dry air, 2 Hz, 20°C, 6 bar)
<b>Operating temperatures</b>	Clip connector	-15°C to 60°C
	Lockable connector	
	Multiwiring connector	
	Industrial Communication	0°C to 55°C
<b>Stocking temperatures</b>		-40°C to 70°C
<b>Vibration resistance</b>		2G - From 2 to 150 Hz (According to IEC 68 - 2 - 6)
<b>Impact resistance</b>		15G - 11 ms (According to IEC 68 - 2 - 27)

Flow specifications		Dual 4/2	Dual 3/2	Single 3/2	Single 4/2
Size 1	Q max. (l/min)	275	415	415	510
	Qn (l/min)	165	235	235	310
Size 2	Q max. (l/min)	-	805	805	1340
	Qn (l/min)	-	450	440	800

## Moduflex Valve System - P2M

### Electrical specifications

Pilot solenoid Specifications			
Electric Connector		M8	Clip connector
Rated Voltage		24 Vdc	
Electric Connection		Not polarized	Polarized
Allowable voltage fluctuation		-15% to +10% (at 20°C)	+/- 10% (at 20°C)
Coil insulation type		Class B	Class F
Power consumption		Without lockable connector: 1W	1W
		With lockable connector: 1,2W	
Visualisation and surge protection		Included into lockable connector	Included on pilot solenoid
Manual override		Configurable: Locking or non-locking, isolated if required	
Response Time of the complete valve (with connector)	3/2 N.C. or N.O.	Actuating: 10 ms	
	4/2 single solenoid	Return: 15 ms	
	4/2 double solenoid	10 ms	
Duty factor		ED 100%	
S & T Series		IP67 (with lockable connector)	IP40 (with clip connector)
Dust and Water protection	V Series	Guillotine connector: IP65	
		25 Pin D-SUB: IP40 or IP65 (depending on female connector)	
		P2M Node: IP65	
		P2M Lite Node: IP20	

### Communication module specifications

Ethernet Protocols		Profinet IO	EtherNet/IP	Modbus/TCP	EtherCAT	PowerLink	CC-Link IE
P2M Node		✓	✓	✓	✓	✓	✓
P2M Lite Node		✓	✓		✓		
Ethernet specifications		According to protocol specifications					
Speed communication		10/100 Mb - Half / Full duplex					1 Gb
Service Web Page		YES			N/A		
Logic power supply		24 Vdc - According to protocol specifications					
Topology (Internal 2 port switch)		Line / Ring			Line		
Valves power	Voltage	20,4 Vdc to 26,4 Vdc					
OSSD compability		P2M Node: Test Pulsed supported					
		P2M Lite Node: Test Pulsed not supported					
Galvanic isolation		P2M Node: 2,5 kV (Logic and Auxiliary power)					
		P2M Lite Node: Common power for both Logic & Valves					
Max. current limit	Total	P2M Node: 4 A P2M Lite Node: 2 A					
	Per channel	150 mA					
	Protection	Polarity inversion, short circuit and Over Temperature					
IO-Link 		Standard Version			-SPC Version		
IO-Link specifications		According to IO-Link V1.1.2					
Speed communication		Com2 - 38 kBd					
Logic power supply		Module powered by IO-Link master according to IO-Link V1.1.2					
Aux. power	Voltage	20,4 Vdc to 26,4 Vdc					
OSSD compability		No			Yes (Test Pulsed supported)		
Galvanic isolation		Yes					
Max. current limit	Total	4A			2A		
	Per channel	150 mA					
	Protection	Polarity inversion & short circuit					
All Protocols		EMC/CE mark		According to EN 61000-6-2 & EN 50081-2			

## Technical characteristics

### Vacuum module

**Fluid**

Compressed air or inert gas, filtered 40µ mini., not lubricated

**Working pressure**

1 to 8 bar

**Working temperature**

-15°C to +60°C

**Materials**

Body: Polyamide 6,6 reinforced fibreglass

Poppet: Nitrile

Nozzle: Brass

Clip connector: Treated steel

### Pressure sensor

**Fluid**

Air or inert gas, filtered 40µ mini., not lubricated

**Working temperature**

0°C to +50°C

**Supply**

10,8 to 30 V DC

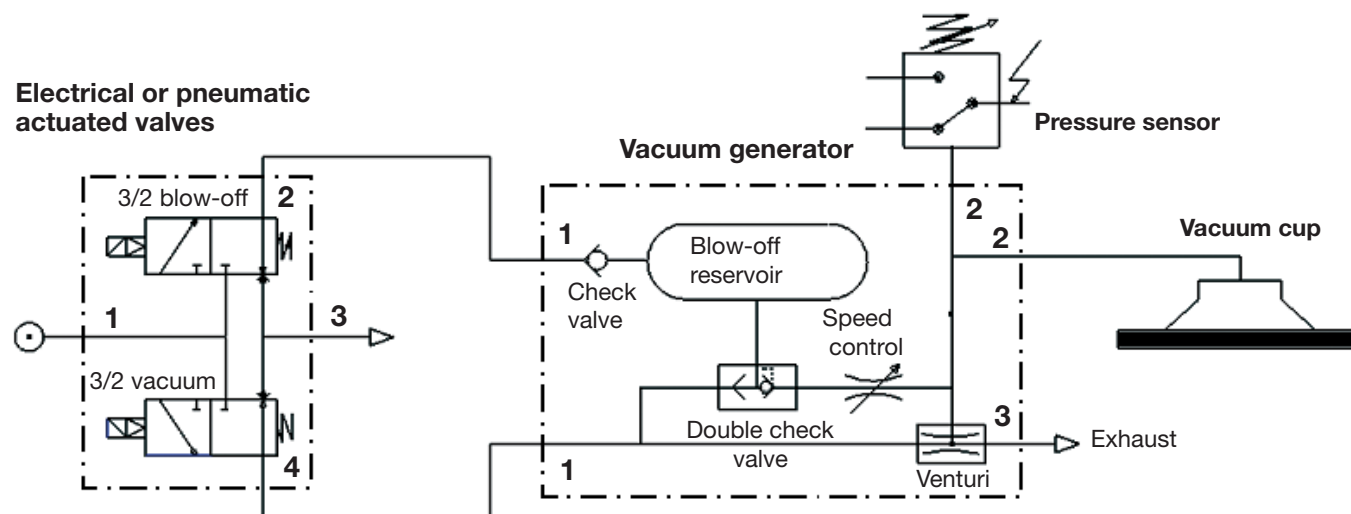

**Digital output**

PNP 125 mA

**Materials**

Body: Polycarbonate

## Connection drawing

## Specific characteristics

### Maximum vacuum

Vacuum level: 90% at 6,5 bar

### Air consumption

Consumption: 46 NI/min at 5 bar

### Vacuum flow

Flow: 25NI/min at 0 % vacuum and 6,5 bar

### Evacuation time in s/l to reach different vacuum levels % (at P = 6,5 bar)

Vacuum %	0	10	20	30	40	50	60	70	80	90
Time in s	0,0 / 0,0	0,3 / 0,3	0,4 / 0,5	0,8 / 0,9	1,4 / 1,5	2,0 / 2,2	2,7 / 3,2	3,7 / 4,9	5,9 / 9,8	10,7 / -
Flow in NI/min	24,9 / 23,2	22,1 / 20,3	19,3 / 17,3	16,6 / 14,4	13,8 / 11,5	11,0 / 8,5	8,2 / 5,6	5,5 / 2,7	2,7 / 0,0	0,0 / -

With silencer / With captured exhaust \*

## Performances

### Vacuum level

### Vacuum flow

\* 1 m exhaust - tube Ø6 mm

3 m exhaust - tube Ø8 mm

### Air consumption

### Operating information

Working pressure	-0,9 to 8 bar
Pilot pressure	3 to 8 bar *
Working temperature	-15 °C to 60 °C
Protection individual M8 connectors	IP 67 NEMA4
Protection individual clip connector	IP40
Protection integrated connectors	IP 65
Voltage	24 V DC
* Single and double 3/2	3,5 to 8 bar

		Dual 4/2	Dual 3/2	3/2	4/2
Size 1	Qmax.	275 l/min	415 l/min	415 l/min	510 l/min
	Qn	165 l/min	235 l/min	235 l/min	310 l/min
Size 2	Qmax.	-	805 l/min	805 l/min	1340 l/min
	Qn	-	450 l/min	440 l/min	800 l/min

### Total ordering flexibility

In addition to the complete product adaptability, the Moduflex valve range offers ordering flexibility for V, T, S and P series with 3 different designs; from all components separately ordered (basic module) to pre-assembled and tested valve island.

### Ordering options

#### 1 - Basic modules ordering

Using this option, all basic components are separately ordered :

- Head and Tail set
- Valve modules
- Intermediate module kit
- Peripheral modules
- Pneumatic connectors, mufflers and plugs
- Electrical connection or fieldbus module

The complete bill of material needed for the valve island assembly can be easily details using page 1 of the Moduflex Valve Configurator software report.

#### 2 - Complete modules ordering

Using this option, modules are defined, ordered and supplied, pneumatic connectors and electrical connection equipped. One part number defines:

- Function module
- Pneumatic connectors, muffler and plugs
- Electrical connection and cable

For an entire valve island configuration, the list of complete modules can be easily details using page 3 of the Moduflex Valve Configurator software report.

#### 3 - Pre-assembled valve islands ordering

Using this option, the complete valves island configuration has to be defined, and may be ordered, delivered fully assembly and tested under one part number.

The Moduflex Valve in-line e-Configurator software is an easy way for a clear definition of the requested valve island configuration.

**Moduflex Valve System - P2M****V series**

## Integrated connections valve islands: V series

In a V series Moduflex valve island, electrical controls are all received by the head module and transmitted to the concerned valve modules through the modular integrated circuit.

The head node may either be a cable multi-connector or a Fieldbus communication node: the next pages show multi-connector cable and a complete choice of bus protocols.

Valve island electrical head module:  
multi-connector or communication nodes

## Valve island configuration

The following page shows all valve sizes and functions that may enter into a V series valve island and, for each valve size, a choice of clip-on pneumatic connectors: tubing size, straight, elbow etc. To receive its pressure supply and collect its exhaust, the island also requires a pneumatic head and tail module set and sometimes an

intermediate module set with 4 configuration plates for different functions.

To receive its electrical controls, the island is completed by an electrical head module, either a multi-connector or by a communication node to be chosen from the next pages.

## Valve island assembly

The above illustration presents:

- **Step ①** : the electrical head module is engaged into the pneumatic head module ;
- **Step ②** : valve modules are one by one screwed onto each other starting from the head module. For this task, the single integrated screw is tightened with a torx T8 standard screwdriver.

The pneumatic connectors may be clipped or unclipped at any stage.

With a LED, a manual override and a labelling for each valve pilot (see illustration), the island front face eases the "man / machine" dialogue.

The resulting valve island length is expressed by the drawing below, while further size details and mountings are presented on the dimensions pages.

## Modules and island ordering

Choice between 3 approaches:

### 1 - Basic modules ordering:

The following page shows these modules supplied without connector, together with the choice of clip-on connectors separately supplied (10 units packs). This approach gives the maximum flexibility.

### 2 - Complete modules ordering:

Page 31 shows the ordering chart for modules supplied with their connectors.

### 3 - Assembled island ordering:

An In-Line configurator, available from the product web-page "<http://www.parker.com/pde/P2M>", allows to specify a valve island that may be delivered assembled.

Communication node:

- Ethernet nodes, width: 126 mm
- IO-Link, width: 94 mm

Multi-connector head module:

- guillotine, width: 47 mm
- sub-D 25, width: 56 mm

Valve modules

- size 1:
- width: 25 mm

Valve module

- size 2:
- width: 37.5 mm

Intermediate

- module:

### Valve Island V Series with IO-Link connection

The P2M Moduflex IO-Link 24 DO node allows a very simple and cost efficient connection to any IO-Link master, centralised into the PLC or decentralised through an industrial Ethernet network.

Designed in both Class A and Class B versions with an isolated auxiliary power, it can easily be adapted to all power supply architectures and follow machine directives

IO-Link

### P2M IO-link 24 DO Class A node with independent Auxiliary Power Supply

The P2M IO-Link 24 DO Class A node can handle a Moduflex Valve bank having up to 19 pilot solenoid valves.

Thanks to its 2 x M12 A coded male connectors, it can be connected to any IO-Link Class A masters and separately receive its auxiliary power supply for valves from an independent source.

The P2M IO-Link 24 DO Class A node exists in 3 versions with the Auxiliary Power M12 connector pin out adapted to any sourcing through a standard M12 cable:

- P2M2HBVL12400A13 / -SPC version: 24 Vdc / 0 Vdc on pins 1 & 3 – Standard version
- P2M2HBVL12400A43 / -SPC version: 24 Vdc / 0 Vdc on pins 4 & 3 – Compatible with Siemens wiring
- P2M2HBVL12400A42 / -SPC version: 24 Vdc / 0 Vdc on pins 4 & 2 – Compatible with Rockwell wiring

### P2M IO-link 24 DO Class B node

The P2M IO-Link 24 DO Class B node can handle a Moduflex Valve bank having up to 19 pilot solenoid valves.

Thanks to its single M12 A coded male connectors, it can be connected to any IO-Link Class B masters receiving its auxiliary power supply for valves on pins 2 & 5 from the only cable simplifying the connection.

### Diagnostic

The P2M IO-Link 24 DO node offers a local diagnostic through 4 LED's located on the visible top side, showing:

- IO-Link com status
- Node error
- Output error
- Auxiliary power

Additional useful diagnostic information can be read by the PLC through the network simplifying diagnostic and allowing predictive maintenance (all details in the user manual)

### Safe Power Capable version (-SPC)

Auxiliary power of -SPC version of P2M IO-Link 24 DO node can be supplied from a safe output device following machinery directives. This includes:

- Output Signal Switch Device (OSSD) test pulse compatible
- Galvanic isolation between 0 Vdc Logic and Aux power
- PP or PM cabling modes

For more details, refer to the "Communication nodes – connection and configuration" section.

## V series valve island: Communication node for IO-Link

Communication node for 19 outputs (Moduflex Pilot Valves)

(The last 5 outputs of this 24 DO node can't be used with Moduflex Valve)

Description	IO-Link Class	M12 A coded Connector connection			Weight (g)	Order code

**Valve Island V Series with Industrial Ethernet connection****EtherNet/IP™**

ETHERNET POWERLINK

**PROFI  
INDUSTRIAL ETHERNET  
NET****EtherCAT™**

The P2M Industrial Ethernet 24 DO node allows a very simple and cost efficient connection to the most popular Industrial Ethernet networks.

Designed with an isolated auxiliary power, it can easily be adapted to all power supply architectures and follow machine directives.

**Product Set-Up**

The P2M Industrial Ethernet 24 DO node offers an IP addressing through 3 rotary switches located on the top side.

The 3 rotary switches allow also a Factory Reset, IP address storage, and DHCP mode addressing.

As soon as supported by protocol, this IP address can be modified through an imbedded web page.

For an application requiring a regular disconnection / reconnection of the node, Profinet and EtherNet/IP protocols allow respectively a Fast Start-Up (FSU) and Quick Connect mode. This mode can be enable or disable .

**Technology / Integrated Ethernet Switch**

The P2M Industrial Ethernet 24 DO node offers 2 Ethernet ports allowing a line topology without external switch. The Ring topology can also be supported (enable/disable) for Profinet, EtherNet/IP and Modbus TCP/IP.

The integrated Ethernet switch support Class C Services allowing used in an isochronous real time (IRT) structure.

**Diagnostic**

The P2M Industrial Ethernet 24 DO node offers a local diagnostic through 7 LED's located on the visible top side, showing:

- Logic status
- Ethernet activity on both ports
- Standard Status due to protocol
- Output error / Auxiliary power

This local information as well as trouble shooting and predictive maintenance diagnostics (Power monitoring, Life cycle counting, ...) are available in PLC through the network and reported on imbedded web page.

When PLC is in "STOP", the web page allows to force ON/OFF solenoids state. This function has a password protection.

**Safe Power Capable**

Auxiliary power of P2M Industrial Ethernet 24 DO node can be supplied from a safe output device following machinery directives. This includes:

- Output Signal Switch Device (OSSD) test pulse compatible
- Galvanic isolation between 0 Vdc Logic and Aux power
- PP or PM cabling modes

For more details, refer to the "Communication nodes – connection and configuration" section.

## Moduflex Valve System - P2M

### V series valve island: Communication node for Industrial Ethernet

Industrial Ethernet node for 19 outputs (Moduflex Pilot Valves)

(The last 5 outputs of this 24 DO node can't be used with Moduflex Valve)

Description	Protocol	Eth. ports	Aux. Power	Weight (g)	Order code

Quick connect straight connector for module power supply	M12 - 5 Pin's Female - A Coding	25	<b>P8CS1205AA</b>

## Valve Island V Series with Industrial Ethernet connection **EtherNet/IP®**

The P2M Industrial Ethernet Lite node 24DO allows a very simple and cost efficient connection to the most popular Industrial Ethernet networks.

In its compact IP40 version equipped with two RJ45 Ethernet ports, it saves size in cabinet applications and offers an easy connection to the network in a line topology.

## Product Set-Up

The P2M Lite Node 24DO is by default in DHCP mode. The module must be assigned to a static IP-Address in order to be controlled via the network.

The Network Configuration settings can be done through the embedded web server of the node as well as "IPconfig", "TIA Portal" or similar methods.

For an application requiring a regular disconnection / reconnection of the node, Profinet and EtherNet/IP protocols allow respectively a Fast Start-Up (FSU) and Quick Connect mode. This mode can be enable or disable.

## Technology / Integrated Ethernet Switch

The P2M Industrial Ethernet Lite node 24DO offers 2 RJ45 ports allowing a line topology without external switch. The Ring topology can also be supported (enable/disable) for Profinet and EtherNet/IP.

The integrated Ethernet switch support Class C Services allowing used in an isochronous real time (IRT) structure.

## Diagnostic

The P2M Industrial Ethernet Lite node 24DO offers a local diagnostic through 5 LED's located on the visible top side and 4 additional on both Ethernet connectors showing:

- Logic status
- Ethernet activity on both ports
- Standard Status due to protocol
- Output error / Power Supply

This local information as well as trouble shooting and predictive maintenance diagnostics (Power monitoring, Life cycle counting, ...) are available in PLC through the network and reported on imbedded web page.

When PLC is in "STOP", the web page allows to force ON/OFF solenoids state. This function has a password protection.

## Moduflex Valve System - P2M

### V series valve island: Communication node for Industrial Ethernet

P2M Lite Industrial Ethernet node for 19 outputs (Moduflex Pilot Valves)  
(The last 5 outputs of this 24 DO node can't be used with Moduflex Valve)

Description	Protocol	Eth. ports	Power	Weight (g)	Order code
P2M Industrial Ethernet Communication Node	Profinet IO	2 x RJ45	3 PIN's male*	190	<b>P2M2HBVN12400RJ</b>
	EtherNet/IP	2 x RJ45	3 PIN's male*	190	<b>P2M2HBVE12400RJ</b>
	EtherCAT	2 x RJ45	3 PIN's male*	190	<b>P2M2HBVT12400RJ</b>

\*) Female 3,81 mm pitch connector included

Configuration file can be download from the dedicated product web page:

[www.parker.com/pde/P2M\\_IE](http://www.parker.com/pde/P2M_IE)

## Individual connection valve islands: T series

In a T series valve island, electrical controls are individually connected to each valve module, onto its solenoid pilot.

As an alternative, air pilot valve modules are also available, to be controlled by individual pneumatic signals.

## Valve island assembly

As shown by the above illustration, the valve modules are one by one screwed onto each other, starting from the head module. For this task, the single integrated screw is tightened with a torx T8 standard screwdriver.

The pneumatic connectors may be clipped or unclipped at any stage.

With a LED, a manual override and a labelling for each valve pilot (see above illustration), the island front face eases the "man / machine" dialogue.

The resulting valve island length is expressed by the drawing below, while further size details and mountings are presented on dimensions pages.

## Valve pilot connections

### 1 - Solenoid valve modules

In its IP40 version, each solenoid shows Clip connection integrating LED and voltage surge protection. The clip connector with flying leads may be ordered separately with independent or interconnected common.

In its IP67 version, each solenoid shows a M8 connection. Lockable connectors, IP67 protected, with LED voltage surge protection and flying lead cable may be ordered for the required length.

### 2 - Air pilot valve modules

No connector has to be ordered: each pneumatic pilot port includes its integrated movable elbow 4 mm OD tube push-in connector.

Typical T series short island for single or double acting small cylinders.

## Valve island configuration

The following page presents all valve sizes and functions that may enter into a T series valve island and, for each valve size, a choice of clip-on pneumatic connectors: tubing size, straight, elbow etc."

To receive its pressure supply and collect its exhaust, the island also requires a

pneumatic head and tail module set and sometimes an intermediate module set including 4 configuration plates for different functions. Valve modules may either be solenoid versions or air pilot versions. Mixing both versions into the same valve island is possible.

Island assembly with a single screw per module

## Modules and island ordering

Choice between 3 approaches:

### 1 - Basic modules ordering:

The following page shows these modules supplied without connector, together with the choice of clip-on connectors separately supplied (10 units packs). This approach gives the maximum flexibility.

### 2 - Complete modules ordering:

Page 27 shows the ordering chart for modules supplied with their connectors.

### 3 - Assembled island ordering:

Page 30 shows the valve island configurator CD-Rom to specify a valve island that may be delivered assembled.

Pneumatic head module:	Valve module size 1:	Valve module size 2:	Intermediate module:	Tail plate:
■ width: 32 mm	■ width: 25 mm	■ width: 37.5 mm	■ width: 25 mm	■ width: 16 mm

Typical T series high flow island for both small and large cylinders.

Typical T series islands combining different valve flows and functions

## Stand-Alone Valve Modules: S series

Very useful to control isolated cylinders, these stand-alone valves module are compact and easy to mount on the machines with neat electrical and pneumatic connections.

As an alternative to electrical controls, valves with air pilots are also available, to be controlled by individual pneumatic signals.

## Valve functions

The following page shows all valve sizes and functions and, for each valve size, a choice of clip-on pneumatic connectors: tubing size, straight, elbow etc."

## Valve main connections

- Outlets to cylinders (ports 2 and 4) on one side.
- Supply P (port 1) and exhaust E (port 3) on the other side. At port 3, exhaust may be collected or receive a clip-on muffler.

## Valve mounting

All valves may be mounted either with side screws or with their integrated retractable brackets.

### Side screw mounting

The brackets are then retracted.

### Optional foot mounting

The brackets are then extended.

## Valve pilot connections

### 1- Solenoid valve modules

In its IP40 version, each solenoid shows Clip connection integrating LED and voltage surge protection. The clip connector with flying leads may be ordered separately with independent or interconnected common. In its IP67 version, each solenoid shows a M8 connection. Lockable connectors, IP67 protected, with LED voltage surge protection and flying lead cable may be ordered for the required length.

### 2- Air pilot valve modules

No connector has to be ordered : each pneumatic pilot port includes its integrated movable elbow 4 mm OD tube push-in connector.

## Modules and island ordering

Choice between 2 approaches:

### 1 - Basic modules ordering:

The following page shows these modules supplied without connector, together with the choice of clip-on connectors separately supplied (10 units packs). This approach gives the maximum flexibility.

### 2 - Complete modules ordering:

Page 28 shows the ordering chart for modules supplied with their pneumatic and electrical connectors and muffler.

## Peripheral Valve Modules: P series

Four additional peripheral modules complete the valve system in order to facilitate the installation of specific cylinder controls:

- Dual flow control, for cylinder speed adjusting;
- Dual pilot operated check valve, for cylinder positioning;
- Pressure regulator, for cylinder thrust adjusting;
- Vacuum generator, for vacuum pad controls.

## Module function selection

### Dual flow control

By controlling the exhaust flows of a double acting cylinder, this module can adjust both speeds: forwards and backwards.

### Dual pilot operated check valve

Combined with a double 3/2 NC + NC valve, this module will block flows and stop cylinder movement as soon as the valve outputs are both exhausted. Better than a 3 position closed centre valve, it provides accurate positioning when mounted close to the cylinder.

### Pressure regulator

The thrust developed by a cylinder often requires adjustment by controlling the pressure to the front or back of the piston. This pressure regulator module enables manual adjustment of pressure on one side of the piston, with visual indication provided by the pressure gauge.

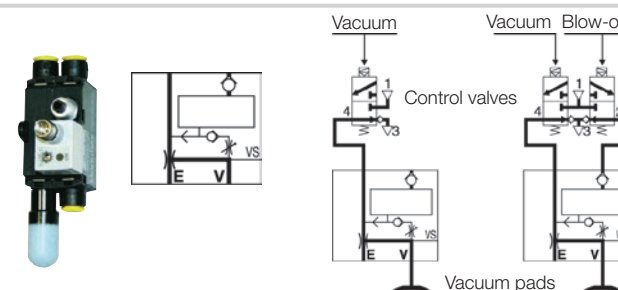

### Vacuum generator

This multi-purpose module controls vacuum pads with a choice between two basics schematics:

- Controlled with only one 3/2 NC valve, the vacuum generator provides vacuum to the pads during valve actuation and then blow-off supplied from an integrated chamber.
- Controlled with a double 3/2 NC + NC, the vacuum generator provides vacuum during the first valve actuation, and then strong blow-off from the second valve.

Integrated blow-off flow controller. Optional plug-in vacuum sensor.

## Module installation selection

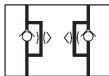

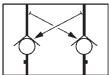

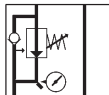

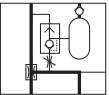

Peripheral modules may either be mounted:

- Plugged into the valve module through double male unions;
- Or in line, close to the cylinder to control it better.

Exception:  
A peripheral module cannot be plugged onto a double 4/2 valve module.  
With this type of valve, use in-line installation only.

## Basic peripheral modules (without connector)

## Complete module ordering, as compared to basic module ordering

### Complete modules

Ordered from the following pages, the complete modules are supplied all equipped with their electrical and pneumatic connectors. Only one order line is necessary, and each module comes complete, with just the necessary chosen connectors.

### Basic modules

Ordered from the previous pages, the basic modules are to be equipped with their connectors. The clip-on assembly to the module is easy. The main advantage is flexibility : connector type and size may be chosen at the last moment, to better fit the machine needs.

Pneumatic clip-on push-in connectors

## V series

See opposite page for complete module order code chart

## T series

See opposite page for complete module order code chart

### Special case : the 2 x 4/2 mini-module plug configuration

For micro-cylinders, this very compact 2 x 4/2 module (order code. JEE) may also be used to obtain 3/2 valves, either Normally Closed or Normally Open. To do so, the complete module may be supplied with plugs that may replace some of the plug-in connectors. To order, use the top chart from opposite page.

## S and P series

See page 28 and 29 for complete module order code charts.

Complete Moduflex modules, equipped with their electrical and pneumatic connectors, may be ordered. To do so, use the below chart to define the complete module order codes.

## Valve modules

## Moduflex Valve System - P2M

### Island head module port sizing

Moduflex is totally flexible: islands may have up to 19 valves for the V Series and is not limited for the T series with a choice of 3 valve sizes, depending on the required flow. Thus, each island has specific needs for the size of its pressure supply and its exhaust collection.

### Choice of connections to an island P and E ports

Valve island pressure supply and exhaust collection are connected onto the head module and, if flows require it, onto intermediate supply modules added into the island.

For this purpose, the choice of clip-on connectors is very open: from 6 to 12 mm OD tubing connectors, either straight or elbows. A clip-on muffler and a clip-on plug complete this offer.

### Sizing recommendations

The 3 valve islands above present typical situations for sizing islands pressure supply and exhaust collection.

In a given island, valves do not deliver their flow at the same moment. Thus, the number of valves in an island is not the major factor to consider. More important is the size of the largest valve and of the largest output tubes to the cylinders.

#### ID section areas of standard tubings

2 x 4 mm: 3 mm <sup>2</sup>	5.5 x 8 mm: 24 mm <sup>2</sup>	10 x 12 mm: 80 mm <sup>2</sup>
2.7 x 4 mm: 6 mm <sup>2</sup>	6 x 8 mm: 28 mm <sup>2</sup>	
4 x 6 mm: 12 mm <sup>2</sup>	7 x 10 mm: 40 mm <sup>2</sup>	muffler: 100 mm <sup>2</sup>
	8 x 10 mm: 50 mm <sup>2</sup>	equivalent

We would recommend the following:

- air supply connection at least equivalent to largest output tube to cylinders;
- exhaust collection at least twice the section area of the largest output tube to cylinders.

For islands with high flows, the following options are possible:

- use tubes up to 12 mm OD or mufflers providing exhaust collection is not necessary;
- provide additional P and/or E connection ports by inclusion of intermediate supply modules, thus keeping tube size small.

At the machine commissioning stage, the supply and exhaust connections can be easily modified until the required performance is achieved.

## Recommendations for building machines with imperial OD tubes (US usual standard)

### size 1 modules

Moduflex is a global product available in the US with the two standards that are commonly used in this country:

- metric OD tubes with the metric connectors shown in this catalogue,
- imperial OD tubes with specific connectors for the US.

Machine builders exporting to the US may propose to their clients one of the following solutions.

- Machines equipped with Moduflex components connected with metric tubes found in this catalogue. Parker will provide products locally for maintenance.

- Or machines equipped with Moduflex components connected with imperial size OD tubes. In this case, use the following procedure to order Moduflex and to build the machine.

### size 2 modules

### Imperial OD tube and metric OD tube comparison

metric standard tube OD	imperial US standard tube OD	metric equivalent	Moduflex clip-on connectors
4 mm	5/32"	4 mm	imperial and metric connectors identical
6 mm	1/4"	6,35 mm	specific imperial connector
8 mm	5/16"	8 mm	imperial and metric connectors identical
10 mm	3/8"	9,53 mm	specific imperial connector
12 mm	1/2"	12,7 mm	specific imperial connector

### head and intermediate island modules

### Moduflex selection for imperial size OD tubes

Such components will easily be obtained with the following procedure:

- 1 - select the required basic modules (with no connector).

- 2 - Select from the list below the clip-on connectors for the required imperial OD tubes.

- 3 - Push-in the connectors into the basic modules 3 - ports in order to obtain complete modules.

## Maintenance procedure

The latest generations of compact pneumatic valves have a life expectancy which generally exceeds the equipment they control. Therefore, although maintenance is seldom required,

when necessary the solenoid pilot, valve or connector can be easily replaced without removing the island base, as shown below.

### S and T series

### V series

Please, use a Torx T8 screw driver. Also possible to use a 3.5 mm screwdriver.

## With only one universal solenoid pilot for all configurations, maintenance is simple

24V DC is now a global standard for all machines.

The Moduflex 24V DC unique solenoid pilot is supplied with the multi-function manual override that can be adapted to all requirements, as explained by the drawings.

Because all Moduflex valve and island configurations are supplied with this unique solenoid pilot, maintenance operations remain very simple.

## Multi-function adaptable manual override

3 - remove lock capability

4 - manual override is totally isolated

Muffler		40	

### Island valves modules

	OD tube	a	b	c
Size 1 modules	4 mm	8	10	12
	6 mm	8	13	16
Size 2 modules	8 mm	9	16	19
	10 mm	13	18	22

## Stand-alone valve size 1

surface mounting with screws  
4 mm dia. into retractable brackets 3 mm thick

or side mounting with  
2 screws 4 mm dia.

## Stand-alone valve size 2

or side mounting with  
2 screws 4 mm dia.

Dimensions and mountings  
of the stand-alone valves  
4/2, double and single 3/2,  
4/3 vented centre and  
4/3 pressure centre.

Special case : 4/3 closed centre.  
Add the dual P.O. check  
valve module that has been  
plugged in the basic valve.

		a	b	c
Size 1 modules	4 mm tube OD	8	10	12
	6 mm tube OD	8	13	16
	Muffler		31	
Size 2 modules	8 mm tube OD	9	16	19
	10 mm tube OD	13	18	22
	Muffler		40	

**Reminder:** peripheral modules may either be plugged in the valve output ports or mounted in line separate from the valve

### Dual flow control module size 1

- with gauge

mounting with 2 screws 4 mm dia.  
on retractable brackets

- without gauge

swivel elbow push-in  
connector 4 mm OD tube

### Dual P.O. check valve module size 1

## Dual flow control module size 2

## Pressure regulation module size 2

- with gauge

mounting with 2 screws 4 mm dia.  
on retractable brackets

- without gauge

swivel elbow push-in  
connector 4 mm OD tube

## Dual P.O. check valve module size 2

## Vacuum generator module

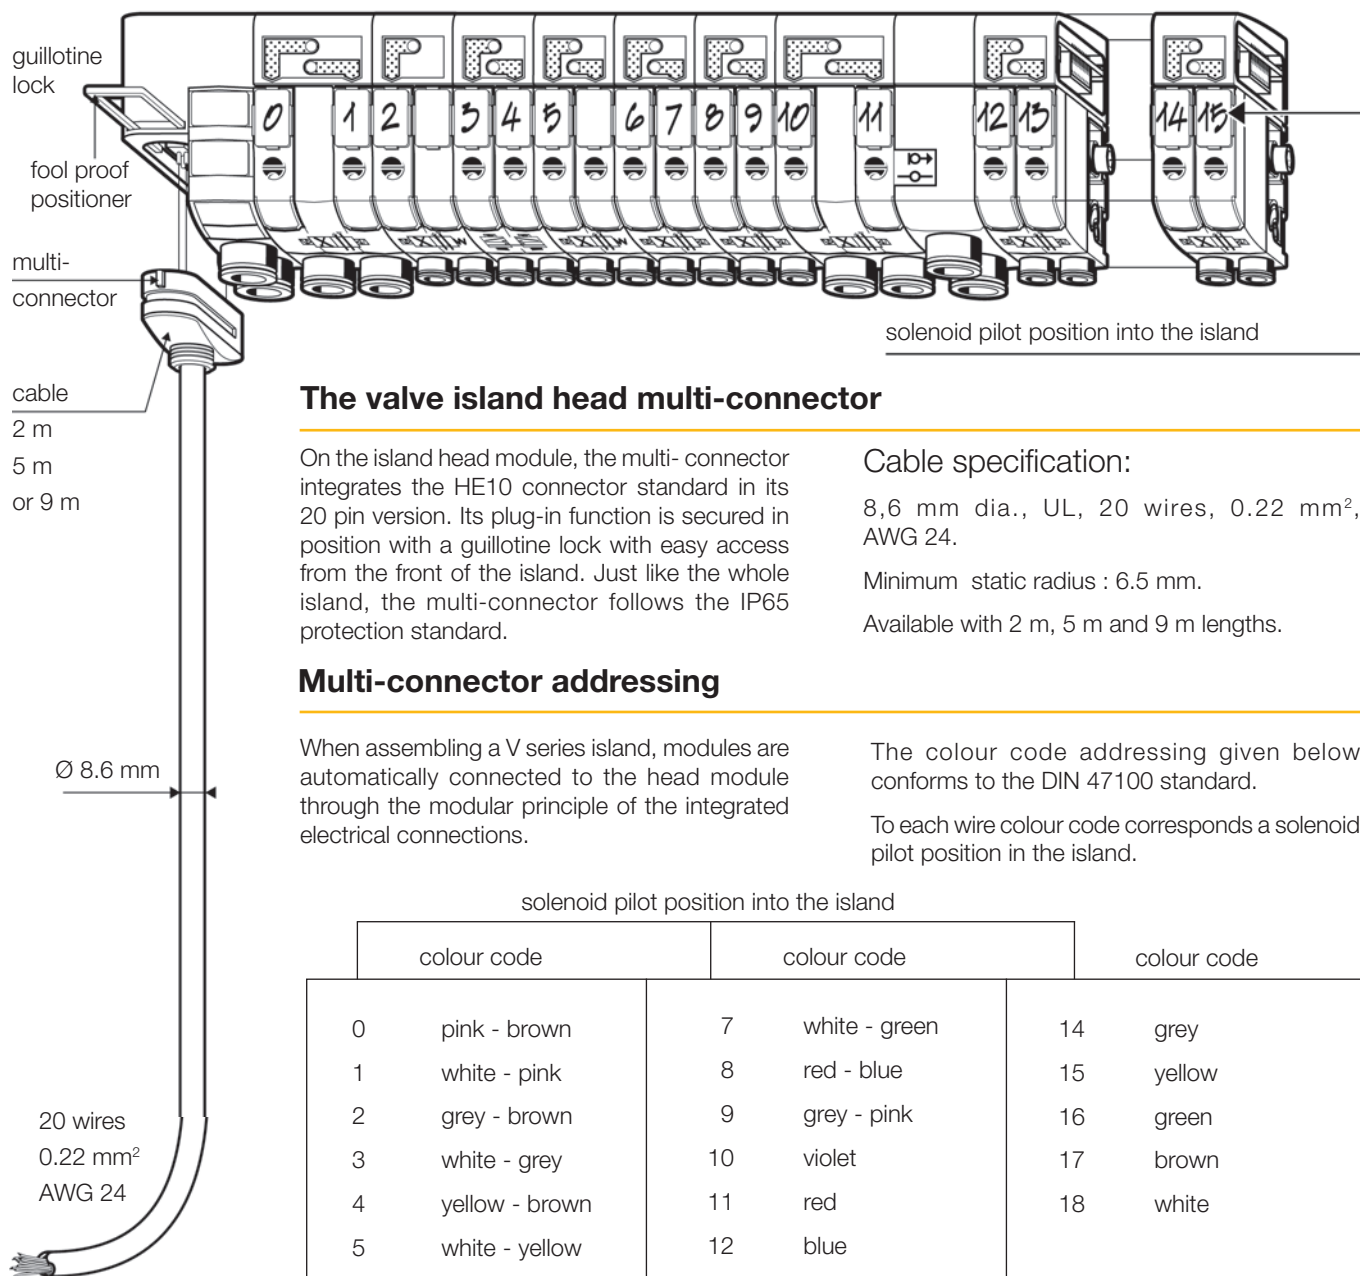

## In-line

## With Moduflex valve

### The valve island head multi-connector

On the island head module, the multi-connector integrates the HE10 connector standard in its 20 pin version. Its plug-in function is secured in position with a guillotine lock with easy access from the front of the island. Just like the whole island, the multi-connector follows the IP65 protection standard.

### Cable specification:

8,6 mm dia., UL, 20 wires, 0.22 mm<sup>2</sup>, AWG 24.

Minimum static radius : 6.5 mm.

Available with 2 m, 5 m and 9 m lengths.

### Multi-connector addressing

When assembling a V series island, modules are automatically connected to the head module through the modular principle of the integrated electrical connections.

The colour code addressing given below conforms to the DIN 47100 standard.

To each wire colour code corresponds a solenoid pilot position in the island.

solenoid pilot position into the island					
colour code		colour code		colour code	
0	pink - brown	7	white - green	14	grey
1	white - pink	8	red - blue	15	yellow
2	grey - brown	9	grey - pink	16	green
3	white - grey	10	violet	17	brown
4	yellow - brown	11	red	18	white
5	white - yellow	12	blue		
6	brown - green	13	pink	common:	black

### Sub-D 25 addressing

Industrial Ethernet node connection and diagnostic functions

Ethernet Ports and Auxiliary Power Connection

Ethernet ports: 2 x Standard Female M12 D-Coded – 5 pins  
Auxiliary Power: Standard Male M12 A-Coded – 4 pins.  
Usage of standard manufactured cables available from your usual electrical supplier is recommended.

Configuration File

The configuration files can be download from the product web page: [www.parker.com/pde/P2M\\_IE](http://www.parker.com/pde/P2M_IE).

IP Address Setting

The IP-Address of the device can be assigned via:

- Rotary Switches, DHCP, Web page, Ipconfig Tool or TCP/IP Interface Object, depending on protocol version:

Description	EtherNet/IP Profinet IO Modbus TCP/IP	Ethernet PowerLink	EtherCAT	CC-Link IE
IP-Address setting stored into the NV-memory of the P2M node	000	000	N/A	000
IP-Address setting determined by the 3 rotary switches:				
<ul style="list-style-type: none"><li>IP Address: 192.168.1.xxx</li><li>Subnet Mask: 255.255.255.0</li><li>Default Gateway for 001: 192.168.1.2</li><li>Default Gateway for 002 - 254: 192.168.1.1</li></ul>	001 – 254	001 – 239	N/A	001 – 120
The device will obtains its address via DHCP	888	N/A	N/A	N/A
Reset to factory status	999	999	999	999
Invalid. The module will not start (see Local Visual Diagnostic section for details)	All others	All others	All others	All others

Case of Use with SAFE Power Source for Valve Control

The P2M Industrial Ethernet 24 DO nodes can support a SAFE OSSD power source for valve control (Aux + / Aux -). It can also be connected in both PP or PM mode.  
For further details, please refer to the Ethernet node user manual available from the product web page:

- [www.parker.com/pde/P2M\\_IE](http://www.parker.com/pde/P2M_IE)

Local and network diagnostic functions

Local diagnostic

The P2M Industrial Ethernet node offers a local diagnostic via 7 LED's. Pls refer to user manual with interpretation given by this table.

Network diagnostic

The P2M Industrial Ethernet node offers additional useful module status information:

- Pilot overload or short circuit
- Auxiliary Voltage out of tolerance
- Cycle counter for every pilot
- Module temperature
- ...

For deeper information on product technical information and a complete interpretation of node diagnostic functionalities, please refer to the User Manual available from the product web page: [www.parker.com/pde/P2M\\_IE](http://www.parker.com/pde/P2M_IE)

## Industrial Ethernet Lite Node connections and diagnostic functions

### Ethernet and Power Connections

#### Network Communication Ports:

2 x Standard RJ45 Female connectors

Usage of standard manufactured cables available from your usual electrical supplier is recommended.

#### Power Supply:

Standard 3-Pin' Male Connector - 3,81 mm pitch

#### Working mode selector:

DIP-switch

### Configuration Files

The configuration files can be download from the product web page: [www.parker.com/pde/P2M\\_IE](http://www.parker.com/pde/P2M_IE)

### IP Address Setting

For both Profinet IO and EtherNet/IP protocols, the P2M Lite 24DO Node is by default in DHCP mode. The module must be assigned to a static IP-Address in order to be controlled via network. Please, refer to the user manual for IP-Address assignment process.

### Local and Network diagnostic functions

#### Local diagnostic

The P2M Lite 24DO node offers a local diagnostic via 9 LED's. Please refer to user manual with interpretation table.

#### Network diagnostic

The P2M Lite 24DO Node offers additional useful module status information:

- Pilot overload or short circuit
- Power Voltage out of tolerance
- Cycle counter for every pilot
- Module temperature
- ...

For detailed technical information on the P2M Lite 24DO Node and a complete interpretation of node's diagnostic functionalities, please refer to the User Manual available from the product web page:

[www.parker.com/pde/P2M\\_IE](http://www.parker.com/pde/P2M_IE)

# IO-Link module connection and diagnostic functions

## IO-Link module connection

Standard male M12 – type A

Usage of standard manufactured cables available from your usual electrical supplier is recommended.

Note: Auxiliary power for solenoids can be wired separately allowing users to turn outputs off while the communications remains active.

## Configuration

IODD file can be downloaded from IODD Finder or the Moduflex web site:

<https://ioddfinder.io-link.com>

[www.parker.com/pde/io-link](http://www.parker.com/pde/io-link)

Class B

Class A

## Legend

Symbol	Description
L+	IO-Link Power Supply "+"
L-	IO-Link Power Supply "-"
C/Q	IO-Link communication
Aux +	Auxiliary Power Supply 24 Vdc
Aux -	Auxiliary Power Supply 0 Vdc

	3 Pin's	5 Pin's	
	P2M...A13	P2M...A43	P2M...A42
1	Aux +	Not used	Not used
2	-	-	Aux -
3	Aux -	Aux -	Not used
4	n.c.	Aux +	Aux +
5	-	-	Not used

## Case of use with SAFE cabling

The Moduflex IO-Link Module can be powered from a 24Vdc auxiliary source in PP or PM mode as grounds are isolated.

IO-Link nodes Class A & B -SPC version are compatible with SAFE OSSD power source for valve control (Aux + / Aux -).

For further details, please refer to the user manual N. 30048690201W05.

Shone here cabling for P2M2HBVL12400A13 / -SPC

## IO-Link module diagnostic functions

The P2M IO-Link node offers additional useful module status information:

- Pilot overload or short circuit
- Auxiliary Voltage out of tolerance
- Cycle counter for every pilot
- Module temperature

For deeper information on product technical information and node diagnostic functionalities, please refer to the User Manual available from the product web page:
