

## EG Declaration of conformity

in accordance with the Directive 94/9/EG (Directive-ATEX)

**Manufacturer:** Rotech Antriebselemente GmbH

**Description of the equipment:** sensor boxes type TCR

**Declaration:** The sensor boxes type TCR are to be considered as signal devices and their enclosure classification is IP 65. Therefore all internal parts are protected from the medium and the sensor boxes adopt the ignition protection method of the respective sensor as the box does not represent an independent ignition source.

The sensors used supplied by Pepperl + Fuchs are certified for: **II 2 G EEx ia IIC T6**. The sensor boxes are licensed for connection with intrinsically safe, certified circuits only.

**Standards:** For the evaluation of the sensor boxes there have been used following standards:

- |                  |   |
|------------------|---|
| EN 50014:02/99 : | Electrical apparatus for potentially explosive atmospheres – General requirements |
| EN 50020:08/03:  | Electrical apparatus for potentially explosive atmospheres – Intrinsic safety „i“ |

**Remarks:** The permissible ambient temperature range is -25°C ...+70°C at a nominal tension of 8 V DC and power input of 3 mA. For circuits with other characteristic values the maximum permissible ambient temperature has to be taken from the EC-Type-Examination Certificate of the sensor.

Only certified, intrinsically safe solenoid valves are permitted to be connected with these equipments. The maximum values of the connected valve have to be respected.

The housing material used has a surface conductivity of less than 1 GΩ. Thus, by proper use, static charges can be avoided.
